ABOUT ME

Product designer with over six years in design, I design core product flows for B2C and B2B products, from onboarding and payments to dashboards, data tables and filters, and keep the design system, Figma structure and handoff clean. I also prototype in real code and ship UI fixes through Git.

EDUCATION

UX design and research

Master's degree

Multimedia Communication

Master's studies, secondary specialization

Information Media and Services

Bachelor's studies

Bont academy

Web design course

FOCUS AREAS

- **Core product flows & onboarding**
- **Dashboards, tables & filters**
- **Design systems & Figma handoff**
- **AI-assisted prototyping in code**

MY MOST NOTABLE COLLABORATIONS

Cybertrends

I lead product and brand design for this consumer cybersecurity company. I own the design system, Figma file structure and handoff to engineers, and ship UI fixes in code.

WebScannerPro

Browser security product with paid plans: onboarding and checkout, a dashboard with protection score, filters and alerts, and the browser extension itself.

ArmaCover

Cyber insurance app and web: sign-in, coverage overview, fast help when something goes wrong, and a dark web monitoring dashboard that turns every breach into next steps.

Ataccama

Product Design Intern in the Product Catalog team of Ataccama ONE, a data quality and governance platform for global enterprises. From JTBD research to high-fidelity, data-heavy UI.

Shoptet UX partner

UX audits and usability reviews for e-commerce stores to improve conversion, navigation and checkout.

Apadore & 1. Web IT

Products and websites for clients of 1. Web IT and Apadore studio, e.g. a premium healthcare platform, and B2B websites for finance and real estate.

Prague Pride Festival

Five years of visual identity and in-house campaigns across online, print, spatial and merch, plus a festival website redesign for my diploma thesis.
